Executive Overview

Performance. Growth. More Memories.

Jan 2021 – Jun 2023

Good morning, Adventurer!
Today is October 26, 2026 | 09:47 AM

Total Revenue

$24.91M

$10.46M	25.16K
gross profit at 42%	orders, AOV $990

Growth, month over month

▲ 7.91%

+$1,827K vs May 2023 - Growing

+26.12%
trailing 3mo vs prior 3mo

Customers

17.42K

33.63% order more than once

$1.43K
revenue per customer

Is growth translating into profit?

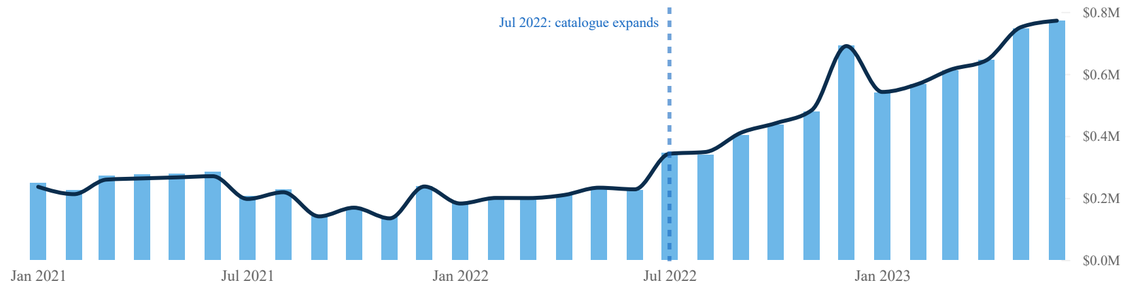

30 months of actuals. The step change is the accessories and apparel launch.

Revenue | Profit | Orders

▲ 8.2%
avg MoM growth, trailing 3mo

$1.83M
best month, Jun 2023

-0.13 pts
margin, trailing 3mo vs prior 3mo

What this means

Growth is real. Margin is the open question

The catalogue changed the business

Before July 2022 only bikes were sold. Monthly revenue was **$533.82K** then; by June 2023, with accessories and apparel added, it reached **$1.83M**

Bikes are 94.89% of revenue at 41.14% margin

Accessories return **62.84%** but only **3.64%** of revenue, on **68.68%** of all units.

The top tenth of customers is 40.36% of revenue

1,742 riders at **$5.77K** each. Losing 5% of them costs about **$502.75K**

RECOMMENDATION

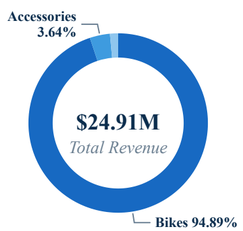

Margin, not growth, is the open question. Push the accessory bundle at checkout, since it is the only lever that raises margin without a price change.

Low Tech Effort · Immediate Rollout

See the full plan →

Revenue by category

Which lines carry the business?

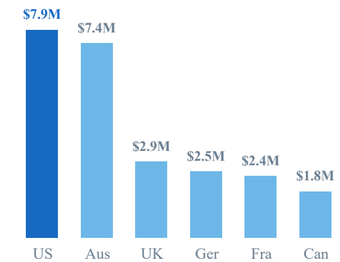

Bike	$23.64M
Accessories	$906.67K
Clothing	$365.42K
Components	$0

Bikes remain the core of the business at 94.89% of revenue, but accessories earn 62.84% margin against 41.14%.

Revenue by country

Where are we the strongest?

United States 31.86% of revenue

The basket effect

Bike orders with and without an accessory

Bike only	With Accessory
$1.87K	$1.60K
40.79% margin	*42.21% margin*

51.04%	-$270
of bike orders attach one	*lower basket when they do*

Margin also rises, 40.8% to 42.2%.

Top products by revenue

Every one of them a Mountain-200 variant

Product	Revenue	Margin %
Mountain-200 Black, 46	$1.24M	46.03%
Mountain-200 Black, 42	$1.23M	46.03%
Mountain-200 Silver, 38	$1.21M	46.03%
Mountain-200 Silver, 46	$1.18M	46.03%
Mountain-200 Black, 38	$1.17M	46.03%
Mountain-200 Silver, 42	$1.13M	46.03%

The top ten products are 39.3%% of revenue, and all ten are the same 3 models in different sizes.

46.03%
margin

Lowest margin

Short-Sleeve Classic Jersey, XL

23.00%
margin

383
units

What this means

Revenue and margin come from different places.

Accessories earn 62.84%, bikes 41.14%.

Every accessory line beats every bike line on margin, on just **3.64%** of the revenue.

Bikes are 94.89% of revenue.

$23.64M across 88 products. The business is a bike shop with a small shop attached.

Ten products are 39.35% of revenue.

Six of them are Mountain-200 variants at **46.03%** margin. Protect that range.

RECOMMENDATION

Bundle a helmet, a bottle and tires at bike checkout. Accessory lines earn at least 62.60% against 41.14% for bikes, so every bundle lifts margin without touching price.

Low Tech Effort · Immediate Rollout

Category performance and action

What should we do with each category?

All | Bikes | Accessories

Category		Revenue	Gross Profit	Margin	H1 Growth	Share	Units	Products	Action
Bikes	Revenue driver	**$23.64M**	**$9.73M**	**41.14%**	▲ 186.80%	**94.89%**	**13.93K**	**88**	Reprice
Accessories	Margin driver	**$0.91M**	**$0.57M**	**62.84%**	new line	**3.64%**	**57.81K**	**22**	Promote
Clothing		**$0.37M**	**$0.16M**	**44.27%**	new line	**1.47%**	**12.44K**	**20**	Expand
Components				0.00%	new line	**0.00%**			Dormant

Accessories and clothing only appear from July 2022, so their first half growth has no prior year to compare against. Bikes grew 186.80% like for like.

Where the margin hides

Accessory lines against the weakest line in the catalogue.

Subcategory	Revenue	Margin
Tires and Tubes	**$0.38M**	62.60%
Helmets	**$0.21M**	63.66%
Jerseys	**$0.16M**	28.35%
Bottles and Cages	**$0.11M**	62.60%
Fenders	**$0.09M**	62.60%

All 8 accessory lines earn at least 62.60%. The weakest line in the catalogue is Jerseys, at 28.35%.

Customer Insights

Who rides with us, and who comes back.

Jan 2021 – Jun 2023

Good morning, Adventurer!
Today is October 26, 2026 | 09:48 AM

Top decile share

40.36%

1.74K *Riders in decile one*

$5.77K *average spend each*

Repeat rate

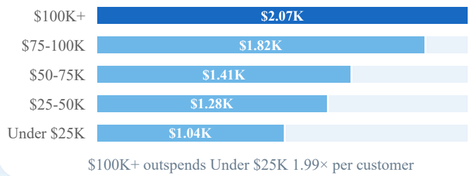

33.63%

1.44 orders per customer

17.42K customers in the file

$1.43K revenue each

Spend by income band

$100K+ outspends Under $25K 1.99× per customer

Segments by recency, frequency and value

Computed against the last order date in the file

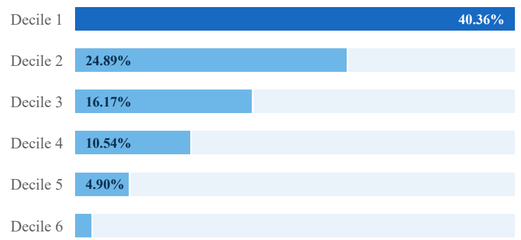

Revenue | Count

Segment	Riders	Revenue	Share of revenue	Avg spend	Recency (days)	Play
High value	1.94K	$9.83M	39.47%	$5.08K	80.00	Retain
Lapsing	6.59K	$8.39M	33.66%	$1.27K	252.00	Win back
Growing	6.38K	$3.68M	14.79%	$0.58K	82.00	Nurture
Loyal	2.18K	$2.27M	9.09%	$1.04K	71.00	Reward
At risk	0.32K	$0.74M	2.99%	$2.30K	579.50	Reactivate

Lapsing is the biggest opportunity: 6.59K riders, $8.39M of past spend, median 252.00 days since the last order.

How concentrated is revenue?

Revenue share by customer decile

Top two deciles **65.25%**

What this means

A small share of riders carries the business.

Revenue is heavily concentrated.

The top two deciles are **65.25%** of revenue. Deciles six to ten together are **3.14%**.

Only 33.63% ever order twice.

And the average rider has placed just **1.44** orders.

6.59K riders are lapsing.

They hold **$8.39M** of past spend at a median **252.00** days since ordering.

RECOMMENDATION

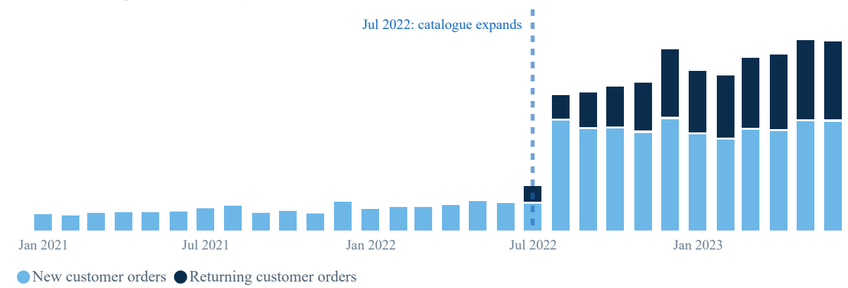

Run a two step reactivation offer at the 6.59K lapsing riders, measured against a holdout group before rolling it out further.

Medium Effort · Phased Rollout (Test & Learn)

See the full plan →

Are riders coming back?

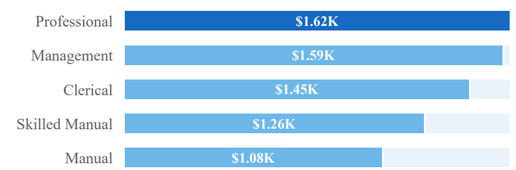

New vs. returning orders, month by month

Returning orders were zero before July 2022, since no one had a chance to return yet. By June 2023 they are 42.45% of monthly orders.

Who spends the most

Average revenue per customer, by occupation

Group	Avg spend	Customers
Home owners	$1.47K	$11.78K
Renters	$1.34K	$5.64K
Bachelors degree	$1.65K	$5.10K

Is revenue growth sustained?

Revenue | Orders

Actuals to June 2023, then a three month linear trend projection fit on the twelve months since the catalogue expanded

Revenue has risen five months in a row, from $1.27M in January to $1.83M in June 2023. The trend projects about $1.89M in July and $2.07M by September, within about $0.18M either side. * The H1 comparison spans the July 2022 catalogue expansion, so it is not like for like.

What this means

Growth has held since July 2022.

Growth started in July 2022.

Monthly revenue went from **$0.53M** in June 2022 to **$0.82M** in July, the month accessories and clothing first sold. H1 2023 is **3.11x** H1 2022.

Growth is still climbing.

Five straight monthly gains, from **$1.27M** in January to **$1.83M** in June 2023.

Bikes built the growth.

Bikes are **88.50%** of the extra revenue since H1 2022. Accessories add **8.14%** and clothing **3.36%**.

RECOMMENDATION

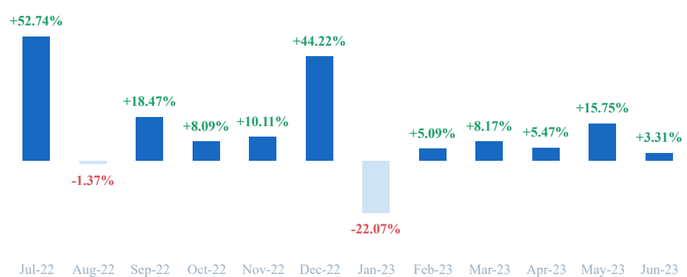

Plan Q4 stock and staffing for a December spike. December revenue rose 72.61% in 2021 and 44.22% in 2022 on the month before.

Medium Effort · Q4 Rollout

See the full plan →

Month over month growth

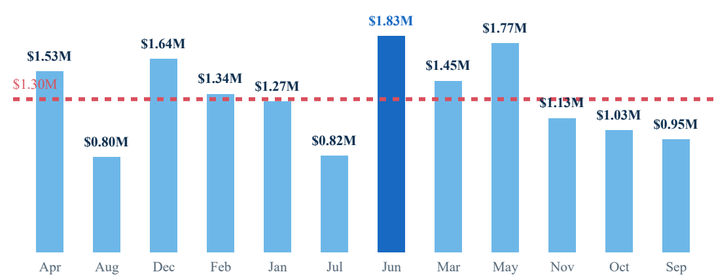

Where did momentum break?

January is the only real fall, down 22.07%, and it follows the 44.22% December jump.

Revenue by month, seasonality

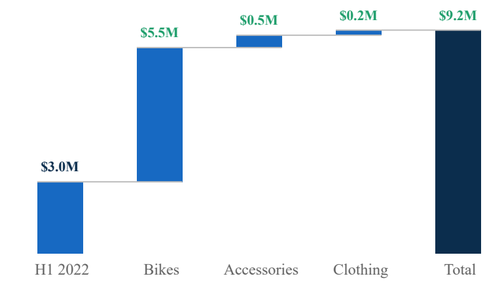

Is there a best time of year to sell?

▲ 40.93% June is the best month, above the $1.30M average.
▼ 37.97% August is the weakest. 12 months only, a first read.

What built the growth

H1 2022 to H1 2023, by category, in revenue

Bikes drive 88.50% of the growth. Accessories and Clothing and Components add 11.50%, and none of it sold before July 2022.

MILES & MEMORIES CO.
EVERY MILE BECOMES A MEMORY

Strategy & Actions

What we do next.

Jan 2021 – Jun 2023

Good morning, Adventurer!
Today is October 26, 2026 | 09:49 AM

01 — Lift the basket in Canada

Low Effort · Fast Pilot | High

Canada places 3,024 orders at $585.07 each, against a $990.09 company average. Its margin is 42.83%, against 41.97% for the company.

Test the accessory bundle and free shipping threshold from Australia, where the basket is $1,223.84, in Canada.

Diagnostic — **Est. +$1.22M revenue**

100% of the Canada basket gap applied

Evidence →

02 — Close the attach gap on bike orders

Low Effort · Immediate | High

51.04% of bike orders already include an accessory. The other 6,820 do not. Orders with an accessory earn a 42.21% margin, against 40.79% without.

Add the helmet, bottle and tyre bundle to checkout for every bike. An accessory order averages $53.39, so closing the whole gap adds about $364.10K.

Prescriptive — **Est. +$364.10K revenue**

100% of the bike attach gap closed

Evidence →

03 — Reactivate the lapsing segment

Medium Effort · Phased | High

6,590 riders hold $8.39M of past spend at a median 252 days since their last order.

Assumes 5% of lapsing riders respond. Run a two step reactivation offer against a holdout group, leading with accessories rather than bikes.

Predictive — **Est. +$419.35K revenue**

100% of the assumed 5% reactivation rate applied

Evidence →

04 — Shift mix from road to mountain

Medium Effort · Next Season | Medium

Road bikes earn 38.70% on $11.29M while mountain bikes earn 45.79% on $8.58M.

Assumes 25% of road revenue (about $2.82M) shifts to mountain, holding total volume constant. Move promotion weight toward the mountain range and review road bike pricing.

Diagnostic — **Est. +$200.07K profit**

100% of the assumed road-to-mountain shift applied

Evidence →

05 — Protect the top decile

Medium Effort · 30-Day Rollout | Medium

1,742 riders generate 40.36% of revenue at $5,772.11 each.

Assumes 5% of this group's spend is at risk. Build a named account list, track recency weekly, and trigger contact at 120 days.

Descriptive — **Est. $502.75K at risk**

Evidence →

06 — Stop planning around the week

Low Effort · Immediate | Low

Revenue varies only 6.40% across the seven days, so day-of-week promotions have no signal to exploit.

Redirect that promotional budget into the seasonal Q4 peak and the accessory attach programme.

Descriptive — **Cost avoided**

Evidence →

Potential Revenue Opportunity
